TECHNICAL DATA SHEET

Product Code: 8353 Sector: Motorsport Issue No: 1 Issue Date: 01/01/22

MOTORSPORT RACING BRAKE FLUID 320 PLUS

High boiling point brake fluid

Application

Designed for racing and high performance braking systems where a non-mineral fluid is required and high braking temperatures are experienced.

Extended performance DOT 4 formulation suitable for competition use.

Equilibrium Reflux Boiling Point above 320°C Wet Equilibrium Boiling Point above 195°C

Performance Profile

U.S. FMVSS No.116 DOT 4 SAE J1704, SAE J 1703

Typical Characteristics

Kinematic Viscosity @ 100 °C, cSt 2.60 Density @ 20°C 1.080

Features & Benefits

- Racing Brake Fluid 320 Plus has a dry boiling point of above 320°C in comparison to the 230°C required for standard DOT 4 fluids. It has the capability to perform at the high braking temperatures found under arduous racing conditions.
- Robust against water absorption, improving resistance to vapour lock.
- Compatible with DOT 3 & 5.1 brake fluids.
- Sustains a higher temperature in comparison to the Motorsport Racing 300 Plus Brake Fluid.
